

## **How to measure for roof lantern blinds**

When **measuring for roof lantern blinds** the first thing you need to do is to decide where in the recess you are going to fit the blind. This location depends a lot on your particular circumstance eg how deep is your recess? Also some of our products are only suitable for installation at certain points in a recess.

**SkyFIT™ Manual Blind** : Must be fitted at the bottom edge of the recess (flush with the ceiling)

**LanternLITE™ Honeycomb blinds (including OPENVIEW)**: Can be fitted anywhere in the recess

**LanternLITE™ Zip & Twin Zip Blinds**: Must be fitted at least 10cm up from the bottom of the recess

1. **Decide Where in the recess to Fit your Blind**
2. **Mark with a pencil**
3. **Measure the width & length in 3 places making no deductions (wall to wall – this is the RECESS SIZE).**
