trouble
SHOOTING

Honeycomb Electric Blind
with Guidewires

1.) With blind powered bring the blind to the most closed position.
2.) On the remote Press UP & DOWN at the same time until the blind jogs once (1 jog = 1 forward & backward motion)
3.) Press the DOWN button until the travelling bar hits the fixed rail.
4.) Once the travelling bar has fully closed, allow an additional 5 seconds run on time.
5.) Press and hold the MY button for 1 jog (1 jog = 1 forward & backward motion).
6.) New limit now set.

First you need to determine if your blind does 1 jog, 2 jogs or 3 jogs when it is powered on

Plug in Power Supply –

1 JOG = LIMIT & REMOTE SET ***(If the blind does this please see instruction 1)**

2 JOGS = LIMITS SET BUT NO REMOTE SET ****(If the blind does this please see instruction 2)**

3 JOGS = NO LIMITS OR REMOTE SET *****(If the blind does this please see instruction 3 for SONASKY)**

3 JOGS = NO LIMITS OR REMOTE SET ******(If the blind does this please see instruction 4 for SONACELL)**

1 jog

*Pairing Remote Instruction 1 – For all blind types

1.) If using a Multi-Channel remote select the exact Channel you wish to assign the Blind to (small red flashing lights at the bottom of the remote) If using a Single Channel remote please ignore this step.

2.) Hold the Reset / Programming Button down on the motor/blind for 1 jog (1 jog = 1 forward + 1 backward motion) and then immediately remove your finger as more jogs will affect the running of the blind.

3.) Press briefly on the small red Reset Button on the reverse of the remote, the Blind will jog once.

4.) The Blind has now been paired to that Channel / Remote.

5.) Follow the same steps if you have multiple blinds on the same remote or individual channels.

2 jogs

1.) If using a <u>Multi-Channel</u> remote select the exact Channel you wish to assign the Blind to (If using a Single Channel remote please ignore this step).

2.) On the remote press 'UP & DOWN' together at the same time, the blind will jog once (1 jog = 1 forward + 1 backward motion).

3.) Press briefly on the small red Reset Button on the reverse of the remote, the Blind will jog once.

4.) The Blind has now been paired to that Channel / Remote.

5.) Follow the same steps if you have multiple blinds on the same remote or individual channels.

3 jogs

1.) If using a Multi-Channel remote select the exact Channel you wish to assign the Blind to (If using a Single Channel remote please ignore this step).

2.) On the remote press 'UP & DOWN' together at the same time, the blind will jog once (1 jog = 1 forward + 1 backward motion).

3.) Press the 'Down & MY' button at the same time, this will send the Blind travelling Downwards

4.) Once the Travelling Bar has fully closed and hit the Fixed Rail, allow additional 5 seconds run on time and press the 'MY' button on the remote to stop the Blind.

5.) Press 'Up & MY' at the same time, this will send the Blind travelling back Upwards.

6.) Once the Travelling Bar has travelled approximately 300mm, press the 'MY' button on the Handset to stop the Blind.

7.) Press and hold the 'MY' button for 1 jog (1 jog = 1 forward + 1 backward motion).

8.) Press briefly on the small red Reset Button on the reverse of the Handset the Blind will jog once.

At this point both the Remote and the Limit are set.
